### **Examiner's Amendment**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the **Specification**:

On Page 8, substitute the following brief description of Figure 3:

Fig. 3 shows affinities of LCMV-NP CTL using serial log dilutions of LCMV- NP H-2d peptide (SEQ ID NO:1) on syngeneic Balb/c targets in a 5 hour 51Cr release assay. Three mice per group were injected with PCMV or PCMV-NP according to protocol 2, of Fig. 1. The overall plateau release was decreased in PCMV-NP treated groups compared to PCMV treated controls, however, the fall-off of the curve was not shifted, indicating that there were no significant affinity differences.

In the **Claims**:

Claim 46 (Currently Amended) The composition of claim 45, wherein the regulatory element is a promoter selected from the group consisting of Mouse Mammary Tumor Virus (MMTV) promoter, Human Immunodeficiency Virus Long Terminal Repeat (HIV LTR) promoter, Moloney virus promoter, ALV promoter, Cytomegalovirus (CMV) promoter, human Actin promoter, human Myosin promoter,

Art Unit: 1636

RSV promoter, human Hemoglobin promoter, human muscle creatine promoter and  
EBV promoter.

The amendment to the Brief Description of Figure 3 was necessary to provide the appropriate SEQ ID NO identifier for the amino acid sequence disclosed in the drawing.

The amendment to Claim 46 was necessary because the copy of the claims submitted 9/24/04 inadvertently truncated the claim after the word "Actin" in line 4. The instant amendment simply restores the remainder of the claim.
